NOTE

The remarkable interest shown of late in the civilization that grew up in the Valley of the Euphrates and Tigris Rivers extends into every corner of its varied life. Happily, the documents which have been unearthed are numerous and varied. History is not written solely from the acts of kings or from the grandiloquent eulogies of court historians—however worthy such acts may have been. The social and the private life of a people are in many instances a much truer index of the culture and the spirit that induced or retarded its advance. The ancient Babylonian temples were great centres not only of religious activity, but of much else that one does not to-day associate with a religious edifice. In the present volume, Dr. Robert Lau has made a study of a series of documents coming from one of the oldest of these temples, dealing chiefly with the manner in which its priests handled the revenues in kind and money which represented the offerings of the faithful. With commendable skill and with happy insight he has furnished a reasonable interpretation of the many difficulties involved in the decipherment of the texts with which he here deals.

In the fifty years during which the science of Assyriology has existed it has attained such proportions that the investigator is forced to become a specialist. The inscriptions that are now at our disposal are so numerous that it is impossible for one man to study all with the needed care and diligence. He is thus forced to select some one period and some one special subject, to which he must devote his whole time.

Few periods in all Babylonian history have become so well known as the one covered by the finds made by De Sarzec (1893-1895) on the site which at present is called Tell-loh. The many thousands of inscriptions which this archæologist dug up have been to a large part edited by such scholars as F. Thureau-Dangin in the *Revue d'Assyriologie*, Vols. III-V, and in the *Comptes Rendus* for 1896, pages 355-361; by G. Reissner in his *Tempel Urkunden*, Berlin, 1901; by H. Radau in his *Early Babylonian History*, New York and London, 1900; by L. W. King in *Cuneiform Texts from Babylonian Tablets* in the British Museum, Parts I, III, V, VII, IX, X, and by G. Barton in the *Haverford Library Collections of Cuneiform Tablets*.¹ The present volume is intended to supplement the above publications. The material has been furnished by the collection of tablets presented to the Library of Columbia University by some friends of the University. The first part gives the contents of 258 tablets

PREFACE

dating from the later dynasty of Ur (2700–2580), in a systematic arrangement and with the necessary comments. Part II contains a full catalogue of all the inscriptions in the collection. The third part was originally intended to be only a ‘Sign List’; but it has developed into a ‘Sign List and Glossary.’ It is hoped that this will considerably facilitate the reading and the translation of the inscriptions, as some of the signs are here translated for the first time. The fourth part consists of thirty-five plates, containing a selection of sixty-one tablets in the series. If possible, the remaining 197 belonging to this period will be published in a second volume.

INTRODUCTION

ERNST DE SARZEC, the French representative at Mosul, after having made many important discoveries during seven previous expeditions (1877–1893), was rewarded for his labors during 1894 and 1895 by the discovery of about 30,000 cuneiform tablets and fragments. The excavations had taken place at *Tellô* or, more correctly, *Tel-Lô*,¹ situated eight miles to the northeast of Shatra, a small Turkish town which is the seat of a *qâ'immaqâm*, or sub-governor. The ruins at the present time include a number of elevations along the left bank of a large canal, probably the bed of the *Shatt-el-Haï*, from which they are distant about three English miles.

The tablets were found buried under a small elevation, situated about 200 yards from the one at which de Sarzec had previously unearthed the ruins of some of the buildings of the most ancient Babylonian kings. He relates that he came upon two groups of rectangular galleries built of crude bricks, in which these large collections of clay tablets were arranged in five or six layers, one above the other. This proves that they must have been regular business archives of the temple, similar to those unearthed at Abû Habba and Nuffar (Nippur). While the excavations were going on these archives were plundered by the natives and the tablets sold, so that now nearly all the leading museums of Europe and America possess collections of them. Columbia University is included in this number. In the year 1896 it bought from Mr. Daniel Noorian 258 ancient clay tablets besides 197 of more recent date. They vary in size from 1.8×2.8 cm. to 19.8×18.9 cm. The obverse is perfectly flat, while the reverse is raised towards

¹ *Revue d'Assyriologie*, vol. III, pp. 65–68.

the middle. Nearly all of them have lines; the characters generally hang from the line above.

Most of the tablets were first inscribed and then baked (Nos. 1-198 and 221-258); some were flattened by means of a seal rolled over the inscription before baking (Nos. 199-220); a few are case-tablets (Nos. 221-223). The bills of lading were provided with holes through which strings were passed, in order that they might be attached to the merchandise to which they refer. All the 258 tablets are in an excellent state of preservation except Nos. 47, 90, 128, 140, 153, 166, 168, 174, 175, 176, 193, 198, 219, 221, 223, 243 and 245, which are more or less damaged. Although quite a number of them were so covered with deposits that the Babylonian characters were in places illegible, it has been possible in most cases to remove the fillings and to restore the inscription.

The collection as a whole can be assigned to the later dynasty of Ur¹ (2700-2580 B.C.), both because of the dates occasionally mentioned and for paleographic reasons, though a large number of the colophons contain only the day and month, or else no date at all. The dates on thirty-two of the tablets are reckoned from the year, or the year after, some king succeeded to the throne, or from an occurrence which took place during his reign. These eras are as follows:

As a rule these tablets refer to the administration of temple property, to agriculture and stock-raising, to trade, commerce and industry. They contain receipts, expense-lists, pay-lists, income-lists, lists of animals (temple herds), lists of officials, account-lists, etc. One contains an inventory of household goods. All testify to the eminently agricultural and pastoral character of this ancient principality.

1. RECEIPTS.

Forty-one tablets contain receipts, indicated by the word SHU.BA.TI = *imbur*, 'received'¹. They generally state

- (a) the amount and kind of goods, etc., received;
- (b) the name of the person from whom they came;
- (c) the name of the recipient;
- (d) the date.

As was noted above, some of these tablets (Nos. 200, 202, 203, 211, 216) have the impression of a seal, whose characters are unfortunately more or less obliterated. As this seal was rolled over the tablet before baking, the latter became flattened and the signs, consequently, indistinct. Three are case tablets (Nos. 221, 222, 223), in which the tablet has the full reading while the case inscription is shorter, the verb SHU.BA.TI being omitted. On the case we find the sign DUB = *duppu*, 'tablet,' before the name of the recipient, which is written exactly as on the tablet and as on the seal of the case.

From the contents of these tablets it can be inferred that a receipt was given for nearly everything received. Receipts were given for large and small amounts of grain, flour, dates, wool, butter, beans(?), slaughtered and live animals, oil-producing grain, date-wine, rations of SHIM-oil, trees, ropes and pitch. Some of the goods received are said to have been intended for certain houses or temples: E GU.ZA.LAL (cf. No. 17); E *dingir* NIN.GISH.ZID.DA (cf. Nos. 9 and 82); E QIN.GISH (cf. No. 75); E DUB.BA MAR.SA (cf. No. 98).

The grain was to be used as food (SHAG.GAL) for men (KAL) at the rate of 60 and 20 QA for each person; for slaves (ERIM) at the rate of 90 QA for each one, and as wages (ID) for female weavers (GEME USH.BAR); it was rent (SHE HAR. RA = she'u hubullu) paid from the produce of a certain field (Nos. 75, 85, 146, 149, 167, 204); the grain was at a storehouse (NI.DUB) (Nos. 101, 103, 108); came from a field (Nos. 223,

¹ Br. 1701 and Hwb. 400.

237): was seed-grain (No. 106); had come in by freight-ship (MĀ.A SIG.GA); cf. Nos. 4, 9, 16, 17, 46, 71, 72, 75, 76, 79-83, 85, 93, 94, 98, 101-108, 145-147, 149, 167, 186-188, 200, 202, 203, 211, 216, 222, 223, 237. Some of these tablets read as follows:

2. EXPENSE-LISTS.

The expenses for the maintenance of the temples, their numerous officials, employees, herds, and fields must have been considerable. The payments to the employees consisted of grain, barley, beans, date-wine and oil. Men received more than women, and women more than children. The women (GEME.USH.BAR) worked at the houses of the weavers (E.USH.BAR).

Sometimes we find, towards the end of the inscription, DIR or LAL.NI written before a given amount. When the balancing of the receipts and expenses produced a 'surplus,' it was expressed by DIR=*atâru*; when the result was a 'deficit,' it was indicated by LAL.NI. This can be easily verified by addition and subtraction.

Many of these lists terminate with ZIG.GA=*nashû* or *nusâhu*, meaning here that the amounts, etc., mentioned before ZIG.GA had gone from the temple, i.e., ‘had been expended.’

The *Expense-lists* can be classified as

- (a) General expense-lists;
(b) Allowances.

(a) *General expense-lists*: ZIG.GA (see above) is always found on such tablets, indicating that certain amounts of grain, flour, etc., had been distributed (expended). Some had been sent (given out) to a temple (No. 196), or to the king (Nos. 246, 255); some were used as food for the patesi's household (Nos. 20, 126), or as feed for the royal stable (Nos. 20, 27, 70, 87, 88, 92, 118, 119, 126, 143, 158, 194, 196, 197, 255) (and 242, 246, 254, but for these see *account-lists*).

5, ZIG.GA, etc.	were expended, etc

(b) *Allowances:* Considerable expense was incurred through the allowances made to the many officials who had come from or gone to various places. The following cities are mentioned in this connection: Adamdun, Amash, Aneda, Dudu, Dubgishni, Gabgabni, Gígili, Gishub (?), Huhunuri, Hunimash, Kimash, Kisha, Limmash, Lubgishgal, Milki, Nippur (written EN.LIL^{ki}), Sabum, Saura, Shash, Shura, Shurib, Sharshe, Si-sha, Susa (written NINNĀ.ERIN^{ki}), Tigabba, Ukala, Uruab^{ki}ma, Za-ul, Zauta, and Zurzura.

The phrase*ta* DU.NI(A)=*ishtu*.*alaku*, is used to express the place from which these officials came;*shu* DU.NI(A)=*ana*.*alaku*, to indicate whither they went. Such officials were paid according to their positions:

(a) the LUH=*sukkallu*, 'messenger, delegate,' was generally allowed, per day, 5 qa of date-wine, 3 qa of barley, and 1 qa of oil; one messenger, however, received as much as 10 qa of date-wine, 4 qa of flour, and 1 qa of oil; while staying in the city (SHAG URU=*ina ali*) another was given 5 qa of flour, and for a journey (KASKAL *shu*=*ana harrani*) 5 qa of flour per day.

(b) The daily allowance for a TÙ.USĒ official was 5 qa of date-wine and 5 qa of barley, or 10 qa of flour; one, however, received 120 qa of date-wine during his stay in the city (SHAG URU), and 200 qa of flour while on a journey (KASKAL *shu*).

(c) The allowances for a LU GISH.MA GU.LA varied: one was allowed 5 qa of date-wine, 5 qa of flour, and 2 qa of oil; another 5 qa of date-wine, 3 qa of flour, and 2 qa of oil; still another 5 qa of date-wine, 3 qa of flour, and 1 qa of oil.

INTRODUCTION

(δ) *The LURIM* received the smallest amount on account of his inferior position: one received, per day, 4 qa of date-wine, 3 qa of barley, 1 qa of oil; a second, 3 qa of date-wine, 2 qa of barley, 4 qa of oil; and a third, 3 qa of date-wine, 2 qa of barley, 2 qa of oil.

Companies of men (slaves?) from the Elamite¹(?) cities Adamdun, Anshan, Gabgani, Hunimash, Kimash, etc., were allowed as much as 40 qa of flour, 20 qa of barley, and 10 qa of oil.

These tablets (75 in number) have the following characteristics:

(a) All of them contain the statement that a certain amount was allowed to certain officials;

(b) They all state that these officials came from or went to a certain city;

(c) On 29 tablets we find, after the enumeration of the different allowances, ZIG.GA, 'expended,' while on 46 of them this is omitted: cf. Nos. 6-8, 10-12, 14, 21-24, 28-39, 40(?), 41, 48-58, 60-62, 65-68, 73, 74, 76, 97, 109-116, 121-125, 127-129, 143(?), 144, 150-152, 190, 191, 224-231.

This is, perhaps, a mistake, for NIM (Br. 9016) = shaqû 'an official,' (R. 28a), as seems to be evident from No. 129 Ob. 3, where it is said: 30 QA GAR | NIM SI.SHA^{ki} *me* = 30 qa of barley to the NIM official of SI.SHA, and from l. 5: SI.SHA^{ki} *ta* gin-ni = from Sisha he came.

NOTES.—l. 6: 191½ GEME (= *amtu*).—It is natural to suppose that this is merely a figurative expression; the same is the case with the phrase in line 11: 45,960 GEME UD 1 *shu*.

The meaning of l. 1-11 is that

(a) l. 1-5: four amounts of wool were woven into cloth at the tablet-house;

(b) l. 6-10: it would have taken 191½ women 8 months to do the work, and 45,960 women 1 day. This is correct, for, multiplying 191½ (the number of women) by 240 (8 months=240 days) we have 45,960; or, if we divide 45,960 (women) by 240 (days) we get 191½ women. Again: l. 17 and 18: a total of 45 shekel of wool was paid at the rate of 5 shekel per woman; according to this statement 9 women were employed; the time of employment must have been 1 month=30 days; 30 × 9=270; cf. l. 18. With this l. 19 agrees: TUR.RA (Br. 1079 'taru')= *again*: the same as to 20 women for 13½ days; 20 × 13½=270.

4. INCOME-LISTS.

A number of tablets contain the statement that a certain amount, etc., came from (the estate of) N.N = *ki.ta*; others are similarly phrased, but the *ki.ta* is omitted. The wording on these tablets is similar to that on the receipt-tablets, with the difference that SHU.BA.TI is missing. They can be called *Income-lists*.

5. LISTS OF ANIMALS.

A strict account was kept of the temple herds. In these herds are found nearly all the various domestic animals known

¹ 1 ⅝ mina = 1 mina 50 shekel,
 4½ shekel = 4 " 90 she.
 60 "

Total : 1 mina 54 shekel 150 she.

to us; the horse and pig are, however, never mentioned. After the enumeration of the herds generally follows the name of the shepherd (NI.KU or ENGAR) into whose care the herd was given; then the name of the city, introduced by SHAG = *ina libbi*, which is followed by the date. In a few cases the name of the chief shepherd (NU.BANDA GUD) or overseer (PA) is found.

The animals are mentioned as being

- (a) present: GUB.BA; GUB.BA.AN or MU.GUB;¹
- (b) given out: ZIG.GA = *nasâhu*, *nashû*;
- (c) snatched away: by sickness, for sacrifices; RIG.RIG².GA;
- (d) missing, not existing: LAL.NI or LAL.NI.A.AN, generally translated by 'deficit.'

There are mentioned the following domestic animals which are divided into various classes:

1. ANSHU; Br. 4984 = *imêru*, 'ass.'
 (a) ANSHU USH = *imêru zikaru*, 'male ass,'
 ANSHU USH I = 'male ass one year old,'
 ANSHU USH II = 'male ass two years old.'
 (b) ANSHU SAL = 'female ass.'
 (c) ANSHU USH AMAR GA = *bûru sha eli tulu-u*, 'a young sucking male ass' (*Hwb.* 707a); AMAR = *bûru*, 'a young child or animal'; GA = *shizbu*, 'milk,' and *tulu*, 'breast.'
 (d) ANSHU USH SHU.GÊ = 'an old he-ass'; GÊ, Br. 6325 = *shâbu*, to be old; SHU.GÊ, Br. 7129 = *shâbu*; see *R. A.* III, p. 130, l. 9.
 (e) ANSHU.GISH = *imêru rabû* = 'large ass'; Br. 5704 GISH = *rabû*.
2. GANAM, 'ewe, *Mutterschaf*.' The sign is LAGABU (Br. 10,151) with GUD or GUD.GUD inserted. For the reading of it see *Z. A.*, III, p. 203, and *H. S. L.*, Nos. 383 and 384; for the meaning see Hommel, *ZDMG*, 46 (1892), p. 566.

¹ Br. 4893 = *nazâzu*.

² Br. 2595 = *laqâtu*, to 'seize, take away.'

3. *GUD*; Br. 5737 = *alpu*, 'ox'.

(a) *GUD GISH* = *alpu rabû*, 'large ox';

(b) *GUD APIN* (or *ENGAR*) III = 'plough oxen 3 years old'; for *APIN* see Br. 1023 = *erêshu*, 'to plant,' and *Hwb.* 140b, 'an ox who helps planting, who ploughs';

(c) *GUD KUL*; must have been similar to the one mentioned in (b);

(d) *GUD SHE*; *SHE* according to *K. B.* III, p. 60, note ††, means 'age of puberty,' '*maennliche Geschlechtsreife*.'

4. *LID*; Br. 8870 = *littu*, 'cow'; *littu* is fem. of *lû*:

(a) *LID AL*; this most likely means *littu rabûtu*, 'great cow,' for *AL* Br. 5749 gives *şîru* as a synonym of *rabû*;

(b) *LID AL SHU.GÊ*, 'a large old cow';

(c) *LID II GISH TUG*, 'cow of 2 years'; meaning of *GISH. TUG* unknown;

(d) *LID E.DUR*, 'stable cows' or 'cows of the yard'; *DUR* (Br. 2664) *tarbaşu*, 'place of lying down, stable, *Huerde*.'

5. *PUĤADU*, 'lamb'; Br. 5489; *Hwb.* 170a.

(a) *PUĤADU USH*, 'male lamb';

(b) *^{sa}PUĤADU*, 'female lamb';

(c) *PUĤADU BA.UR*, 'weaned(?) lamb';

(d) *PUĤADU NU.UR*, 'lamb not weaned(?)'.

It is not certain what the meaning of *BA.UR* and *NU.UR* is; both expressions must have reference to age, as Th. Danguin suggests *R.A.* III, 123, l. 3. We know only that, since the *PUĤADU BA.UR* are mentioned as being shorn, they must have been older than the *PUĤADU NU.UR*, of which no such mention is made; and as they were not old enough to be called 'sheep,' the former may have been the 'weaned' and the latter the 'not (*NU=lû*) weaned.'

6. *UDU*; Br. 10,681 = *imмерu*, 'sheep.'

(a) *UDU GAL*, *imмерu rabû*, 'large sheep,' perhaps 'ram'.

(b) *UDU NI*, 'fat sheep'; for *NI* see Br. 5314 = *barû*, *Hwb.* 184a;

(c) *UDU SHE*, 'male sheep at the age of puberty';

- (d) UDU *urišu* = 'pregnant sheep'(?);
 (e) UDU USH cannot here mean (as with PUHADU and ANSHU) 'male sheep,' but may mean 'pubescent'; for USH according to Br. 5041 = *ridû*, which *Hwb.* 614a translates '*befruchten, zeugen*' = to 'fecundate.'
 (f) UDU.USH BAR ZU, 'a full-grown (pubescent) female sheep'; BAR = *pîtû*, 'to open,' ZU = *mashku*, 'the skin,' then BAR ZU = 'to open the pudendum'; it is a full-grown female sheep whose pudendum has been broken, *i.e.*, one which has had sexual intercourse.
 7. BIR = *urîšu*, 'kid of a goat'; Br. 2030 and *Hwb.* 137 and 377a, 'young goat'; URISHU SAG, probably 'weaned kid'; SAG = *asharidu* must have reference to age; not a sucking kid but one that is older.
 8. UZ, according to Br. 3707 = *enzu*, 'a female goat'; see *Hwb.* 99b.

NOTE.—The mode of writing on col. I. l. 3-7 is peculiar. The first and smaller number written at the beginning of each of these lines represents the number of sheep belonging to the temple; the larger number, written below, between or after the names, represents the same number plus the sheep which constitute, in each case, the shepherd's pay.

6. LISTS OF OFFICIALS AND EMPLOYEES.

Much light is shed by these tablets on the administration of the empire of Ur during the middle of the third millennium

before Christ. Some of them enumerate certain quantities of flour, date-wine, oil, etc., allowed to officials during their stay at Shirpurla^{ki} or for their maintenance while on official journeys (see 'Allowances'); others contain a nearly complete list of these officials. It is not always possible to render an exact translation of their titles; in some cases we can only guess at the meaning. What their mission was is indicated either in a few words only or not at all. This will be better understood from the following list of official names as found on these tablets:

- (a) AB.BA ENGAR, 'chief of the shepherds' (or farmers); No. 175 ob. 6. See s. v. ENGAR.
- (b) AB.BA KAL.LA=*nasîku*, *shêbu dannu*; Nos. 248 and 249 ob. 14.
- (c) AB.BA URU (Br. 3820)=*nasîku*, 'prince, chief man of a city.'
- (d) DAM.QAR (Br. 11,122)='merchant, trader, agent.' *Hwb.* 222b; *ZA.* VI. 349; *R.* 4. Nos. 162 ob. 10; 248 III. 12, 19.
- (e) DUB.SAR, 'scribe' or 'secretary.' DUB (Br. 3935)=*duppu*, 'tablet'; SAR (Br. 4336)=*shaṭârû*, 'to write.' The duty of the DUB.SAR consisted in keeping a strict account of the temple herds and of all that was brought to or taken from the temple. One scribe is called DUB.SAR E DUB.BA=*dupsharru sha bit duppê*, 'scribe of the house of tablets' (No. 162), and another DUB.SAR GUD UDU=*dupsharru sha alpê u immerê*, 'scribe of (over) oxen and sheep' (No. 162). *RA.* III, p. 130, l. 4, we find a DUB.SAR GUD ENGAR, 'scribe of the plough oxen,' and *OBI.* 126 IV. 8, a DUB.SAR GUD X, 'scribe of the oxen that are 10 years old. DUB.SAR GUD II and DUB.SAR GUD I also occur and can only mean 'scribe of the oxen 2 years and 1 year old,' since there would hardly have been scribes over merely 1 or 2 oxen. The oxen were classified according to their age, and over each of these classes a *dupsharru* was set.

- (j) ENGAR (Br. 1024) = *ikkaru*, 'farmer' or 'shepherd.' The word must also mean 'shepherd,' compare (No. 80) E UZ ENGAR *shu* = *ana ikkari sha bît enzê*, 'for the shepherd of the goats' stable.' *OBI*. p. 28, note 3, states correctly that ENGAR is a Semitic loanword adopted by the Sumerian language (see Zimmern, *Babylonische Busspsalmen*, p. 5, note 1, and *ZA*. III, p. 199ff.) and a synonym of *erêshu*, 'to plant' (Br. 1023), and of *nâqîdu*, *rid alpi*. In passages like Gudea F col. III. 1, 14, the following words occur for 'shepherd': ENGAR, UTUL, SIB, NA.GID.
- (g) GIR (Br. 9180), 'an official whose duty it was to look after the food for officials and temple herds.'
- (h) HA.ZA.NUM (= NU.BANDA) = *hazânu*, 'overseer'; *R*. 19b. No. 191 *R*. 6.
- (i) IBERA, IP (Br. 813) = *damqâru*; see above DAM.QAR; *R*. 4. Nos. 105 *R*. 4; 185 *R*. 1; 242 IV. 8.
- (k) QA.SHU.GAB. If it is the same as SHU.QA.GAB (Br. 7093) then it means ^{amel}*shakû*, 'a high official.' But it must be noticed that QA, 'a measure,' + SHU, 'hand,' + GAB (*nashû*), 'lift up, stretch forth' = 'one who stretches forth the hand to the QA measure,' i.e., 'a measurer of grain.'
- (l) GALU ^{gish}KU (GU.LA) = *amelu* + ^{es}*kakku* (+ *rabû*), i.e., 'a man with a (large) weapon, a (great) spearman.' Nos. 222 ob. 2; 248 III. 16.
- (m) GALU.RIM (or KABAR), 'official inferior to the LUH or SUKKAL.'
- (n) LUH or SUKKAL (Br. 6158) = *sukkallu*, 'a messenger, delegate or authorized agent.'
- (o) LUH MAH or SUKKAL MAH, 'a chief delegate.'
- (p) NI.KU.—Br. 5323 = *rabû*; 5338 = *zikâru*; 10547 = *rubû*. It occurs only twice on the tablets of this collection: on No. 86 the NI.KU has under him 120 cows and 120 oxen, while on No. 223 *Lukani* the NI.KU comes after the ENGAR (shepherd), that is the highest official (NI.KU) is mentioned last. The statement of Th. Dangin (*R*. A.

III, p. 129) that a NI.KU had 5 NU.BANDA.GUD under him and that a NU.BANDA.GUD was set over 2 shepherds is probably correct.

(q) NIM (Br. 9016) = *shaqû*, 'a high official'; R. 28a. NIM occurs generally before names of cities, which are sometimes followed by the genitive particle GE (KIT), as on No. 109 ob. 5: NIM KI.MASH^{ki} GE SHU.BA.TI = 'the NIM official of Kimash has received.' NIM is not a determinative before names of Elamitic cities.

(r) NU.BANDA, 'an official higher than a shepherd.' In II. R. 51, 44 the Assyrian equivalent for the term is given as *labuttû*, of which *Hwb.* 373a says that it is 'the name of an official.' Jensen, *KB.* III¹, p. 31, note . . . , translates it '*stellvertretender Aufseher.*'

(s) NU.BANDA GUD = *labuttû sha alpê*, 'overseer of oxen,' or according to RA. III, p. 129: 'overseer over two shepherds.'

(t) PA.—According to Br. 5568 and 5590 PA = *aklu* and *shapiru*, 'scribe' (*Hwb.* 56a). It seems that the *aklu* was especially the scribe or recorder for the different classes of employees, for we find

akil ba-ri-i, 'scribe of the magicians,'

akil damqari, 'scribe of the agents,'

akil kallê (= ^{amel}PA *sha* ^{amel}MU^{pl}), 'scribe (recorder) of the servants of the temple.'

Perhaps PA is best translated 'recorder'; this view seems to be sustained by the above passages and a few others: PA E, 'recorder of the temple'; PA SHANGU, 'recorder of the priests'; PA LUGAL ENGAR, 'recorder of the king's shepherds.' The phrase (No. 43) PA LUGAL.ZAG.GI.ZI GUD ^{dingir}NIN.GISH.ZID.DA most likely means that 'Lugalzaggizi was (PA) recorder of all the oxen that belonged to the temple of the god Ningish-zidda.'

(u) SANGU (SHIT) = *shangu*, 'priest'; Nos. 44 R. 1; 236 ob. 3; 252 III. 12; IV. 3, 14.

(v) T̄U.US̄H(GAL), 'a weigh or paymaster,' that is, 'a man (US̄H) who handles shekels (T̄U)'; R. 13a. Nos. 6, 22, 62, *et passim*.

There were doubtless other officials who occupied high positions and took part in the administration of the cities and temples; only those given above are mentioned in the tablets of the present collection.

Besides these others are named who were merely employees:

AD E=*abû sha bîti*, 'major domus.'

DUMU DA.BA, 'an attendant.' No. 254 I. 7.

GALU GISH.NI, 'man set over oil trees.'

7. ACCOUNT-LISTS.

That there must have been much business traffic between the different cities is evident from some of the tablets which contain *grain accounts* (see also *RA*. IV, p. 76); the transportation of the grain took place in boats, and was facilitated by the numerous canals which penetrated to nearly every part of the country.

The *account-tablets* deal not only with grain and flour, but also with wool, cattle, pitch, money, *adâru*, *karpâte namrâte* (fine vessels, pots), and one refers to a field.

(a) *Grain and flour accounts*.—Sometimes only a simple statement is made in regard to the grain, then the names of the farmer (ENGAR) and of the field (A.SHAG) are given, which latter is in some cases preceded by NI.DUB (= 'storehouse', cf. *Hwb.* 699); Nos. 15, 43, 154. On some the grain is designated as food for the slaves (?) of a temple, No. 25; or as food for men and cattle, No. 253; some of it had been bought for money, (AZAG *ta* SHAM *shu*), Nos. 131, 208.

Most of the large amounts consisted of a number of consignments which had arrived, frequently by boat, from different cities and places. After the enumeration of these the totals (=SHU. NIGIN) are given; then follows the statement how these were disposed of, invariably expressed by the phrase SHAG.*bi.ta*, 'of this amount.' The grain had either been sent to different persons, had been expended (ZIG.GA), or was still on hand (MU.GUB). Then in the last column of the reverse, before the date, the statement is made that this is a 'business transaction' (NIN.SHID.AG) of or between certain parties who are mentioned; cf. Nos. 238, 239, 240, 242, 252, 256.

(b) *Wool-account*.—The numerous temple herds were a source of considerable income, consisting especially of wool (SIG, Br. 10,781). When the sheep had been shorn the wool was sent to the E USH.BAR, 'house of weaving,' to be spun and woven by numerous bands of women weavers (GEME USH. BAR) into cloth for garments (SIG.KU or merely KU = '*shipâtu ana lubushtu*'; see Br. 10,781; *Hwb.* 372b, 678b; *K.B.* III, p. 30, note 10).

Some of our tablets give an enumeration of the herds from which the wool had been obtained, together with the names of the respective shepherds and the name of the city.

The wool was

- (a) SIG DU, 'common wool'; *R. A.* III, 136;
- (b) SIG GIG, 'black wool'; Br. 8922 = *šalmu*;
- (c) SIG DU GIG, 'common black wool';
- (d) SIG LUM, 'LUM wool'; Br. 11,186, 11,187 = *unnubu, ushshubu*, 'to sprout.'

The wool itself was used for first, second, third and fourth class garments, also for 'extra fine' clothing and garments of mourning.

- (a) SIG KU LUGAL, 'wool for first class garments' (=royal quality);
- (b) SIG KU UŠH LUGAL, 'wool for second class garments' (=next to those of royal quality);
- (c) [SIG] KU III^{kam} UŠH, 'wool for third class garments';
- (d) [SIG] KU IV^{kam} UŠH, 'wool for fourth class garments';
- (e) [SIG] KU NIN.LAM (=NE), 'wool for extra fine garments'; see *Br. 12,055 lamḥushshu*, *Hwb. 380*;
- (f) SIG MUK, 'wool for garments of mourning'; see *Br. 95 muqqu*, *Hwb. 423b*.

In some cases the wool is said to have been shorn from certain parts of the body; we find

- (a) SIG TIK KUD, 'wool shorn from the neck or back' (TIK, *Br. 3215* = *kishâdu*, 'neck'; KUD, *Br. 372* = *nakâsu*, 'to cut');
- (b) SIG GISH GA ŠU AG, 'wool shorn from male goats' (GISH, *Br. 5707* = *zikâru*, 'male'; ŠU for ŠU.KAR = *uniqu*, 'goat'; AG, *Br. 2792* = *rashû*, 'to seize, take'). *HSL.*, p. 37, No. 419 SIG.GA ŠU AG.A (the same as SIG GISH GA ŠU AG?) is translated 'a garment'; but this cannot be the meaning here, as KU LUGAL = '*lubushtu sharrutu*' follows; for this reason it can only mean 'wool was taken from the (GISH ŠU =) male goats.' Or is the meaning 'twisted, spun'? Cf. *R. A. III*, 129, note 1.

On one of these tablets it is stated that the wool was weighed (or bought?) in *Kinunir^{ki}* (SIG *ba.LAL SHAG KINU.NIR^{ki}*); on another that its weight (or price?) (=KI.LAL.bi) was.; cf. Nos. 96, 139, 159, 160, 161, 250, 258.

To the collection belong five tablets (Nos. 5, 99, 100, 162, 185) which begin with the phrase GĀ(or MAL=*bîtu*).DUB.BA. The inscriptions are very short, with the exception of No. 162, which has on the obverse 11, and on the reverse 12 lines. The latter (162) gives a list of officials (see 'List of Officials'). Lines 1 and 2 read: MAL DUB.BA | SHI.NIN.AG.DÊ='house' or 'temple tablet (list) of skillful persons (officials) employed'; cf. 'sign-list and glossary,' No. 240.

- No. 235. Nearly complete clay tablet, 2.9×3.3 cm.; slight abrasions on lower left corner and edge of obverse; on obverse 7, on reverse 5 lines. *Account* of three droves of sheep: 60 rams (UDU.USH) had come from Kimash, 60 male kids (URIŞU.USH) had gone to Zidscha, and 60 rams (UDU.USH) to H_ubum. Date: month SHU.KUL.
- No. 236. Complete clay tablet, 3.5×4.4 cm.; on obverse 6, on reverse 5 lines. *Income-tablet*: $\frac{1}{2}$ MA.NA of silver (KU.BABBAR)—a full offering (SHAG.SI = *kirbu malû*)—from Urkal, priest of Ninshul for the temple in Nippur. Date: month ZIB.KÛ of the year in which the throne of Bêl was erected.
- No. 237. Complete clay tablet, 3.2×3.7 cm.; on obverse 6, on reverse 4 lines. *Receipt* (SHU.BA.TI) for 3 gur 240 qa and 2 gur of grain which Ur-Ninmar^{ki} received from the field of the god Bau. Date: year in which Inc-Sin became king (cf. No. 223).
- No. 238. Nearly complete, gray-colored clay tablet, 4.8×9.3 cm.; part of face of obverse near upper right-hand corner, part of last line at bottom edge of reverse and small piece in lower part of reverse broken away; on obverse 13, on reverse 15 (curved) lines. A hole passes through the tablet, near the lower part of the right-hand edge of obverse, for a string, by means of which the tablet could be tied to the goods sent. *Account of grain*: the total amount of grain to be sent was 1225 gur (cf. obv. l. 1–11); of this amount (SHAG.BI.TA) only 1099 gur 98½ qa were on hand (MU.GUB, cf. rev. 8). The consignment or cargo came by freight ship (rev. 9: NIN.SHID.AG MĀ.A SIG.GA). Date: the year in which king Bur-Sin devastated Urbelum.

No. 239. Nearly complete clay tablet, 4.8×4.5 cm.; some characters on lower part of obverse and upper part of reverse entirely effaced; on obverse 18, on reverse 14 lines. *Grain-account*: on hand were 22 gur $24\frac{1}{3}$ qa of grain from Siggantum, 2 gur and 4 gur from Ur-Enlillal, and 3 gur from Ur-Galalim—a total of 31 gur $24\frac{1}{3}$ qa (cf. obv. 8); of this amount (SHAG.BI.TA) 23 gur 210 qa were in different amounts given out to Ningalla, plus 7 gur $114\frac{1}{3}$ qa (cf. rev. 8), which when added give the total 31 gur $24\frac{1}{3}$ qa. The whole is a business transaction (NIN.SHID.AG) of Lu-Bau. Date: the 15th day of the month SHE.QIN.KUD of the year after Kimash had been devastated.

No. 240. Nearly complete clay tablet, 6.5×8.3 cm.; upper left-hand corner of obverse and corresponding part of reverse broken away, a piece broken out of face of reverse below the middle. On obverse and reverse 2 columns with 15, 14, 13, and 7 lines. *Income-tablet*: an account of wheat and money received (SHU.BA.TI, cf. rev. I. 10) is given. Total amount of wheat: 1100 gur $66\frac{1}{3}$ qa (obv. II. 11); of money: 2 mina 5 shekel 105 she (obv. II. 12); this had been brought in different amounts (obv. I. II); three of them were payments of former deficits (LAL.NI, cf. obv. I. 10, 12; II. 9). The reverse—partly mutilated, partly filled in with deposits—forms no connected text; it begins with (SHAG.BI.TA) 'of this amount 488 gur 163 qa per tablet of Ningishzidda, etc.; its wheat (SHE.BI) is 2 gur 150 qa NIN.U.SHU.BA.TI (received); MU.GUB (present) 9 gur $58\frac{1}{3}$ qa.' Date: the year in which Kimash was devastated.

No. 241. Nearly complete clay tablet, 6.7×10 cm.; piece broken out of face of obverse, extending from upper right-hand corner to below the middle of left-hand edge. On obverse and reverse 2 columns with 13, 9, 13, and 4 lines. The first 3 lines on obv. I are broken away; the beginning of each of the following 8 lines is wanting. *List of employees*: seven entries of like nature are made, e.g., obv.

I. l. 11ff.: 3 IGI.ERIM (= *paqâdu*, 'to watch,' cf. Br. 9450) 9 gur 120 qa Akalla ^{*gish*}SAR^{*dingir*}KA.DI (garden of the goddess Kadi), PA (official) Ur-Bau. Rev. III. 9-13: 10 IGI.ERIM 65 gur 60 qa Ur-Neshu son of Abbamu, garden of Gula, etc. Date: the year in which Bur-Sin became king.

No. 242. Complete clay tablet, 4.2 × 10.3 cm.; on obverse and reverse 2 columns with 15, 18, 14 and 10 lines. *Account of grain*: Obv. I. 1-10 states that 1927 gur 167 qa of grain and 1 gur 150 qa, a total of 1929 gur 17 qa, were on hand at the cattle house (E.GUD); of this amount (SHAG. BI.TA, obv. I. 11) 851 gur 175 qa and 190 gur 7 qa went to Urdam (obv. II. 5), 265 gur 115 qa to Ur-Kal (obv. II. 9), 84 gur 230 qa to Gudea (obv. II. 11), and 537 gur 90 qa again to Urdam (obv. II. 14-16). Rev. III. 3 states the total amount (SHU.NIGIN) given to each: to Urdam 1578 gur 272 qa, to Ur-Kal 265 gur 115 qa and to Gudea 84 gur 230 qa; total of totals (SHU.NIGIN.NIGIN rev. IV. 1) 1929 gur 17 qa, the exact amount that had been on hand (obv. I. 10). The business transaction (NIN.SHID.AG) was executed by Lu-Dungi at the granary (SHE.E) of the god Ninmar^{*ki*}. Date: the year after the 'damqar' of Ish(i)-Dagan had built a temple.

No. 243. Nearly complete clay tablet, 4.8 × 7.1 cm.; left-hand bottom corner of obverse and corresponding part of reverse broken away, extending to right-hand corner. On obverse 9, on reverse 4 lines. *Account of a field*. The tablet reads: GAN (= *eglu*, *bîtu*) | A.HU.A | UR.GISH.MAR *dumu* GĪ.NI. MU | SI.RU | NAR (or LIB).A.MU | 40 UR^{*dingir*}DUMU.ZI | DUB NAMGARU | 20 UM.MI.A E | DUB BA.KA | 10 GALU.A.NI | A.SHAG LUGAL.SHAG.GA.

No. 244. Part of a clay tablet, 6 × 9 cm.; top and bottom of obverse and corresponding part of reverse, and the beginning of 9 lines on reverse broken away. On obverse 17, on reverse 16 lines. *Inventory of cattle, land, orchards, and furniture*

belonging to (for translation see 'Introduction,' p. 47).
No date.

No. 245. Part of a light-gray clay tablet, 6.7×10.3 cm.; about one-half of 2 columns on obverse and more than the corresponding part on reverse broken away. Only the inscription on column I of obverse with about 19 lines remains, nothing of column II and columns III and IV of reverse. *Income-list* of several amounts of flour—2 to 9 gur.

No. 246. Nearly complete clay tablet, 5.2×10.6 cm.; on obverse many of the characters are either filled in or effaced, on reverse a few are obliterated (see l. 1 and 2 to 7); small pieces broken away near left-hand edge below the middle and at the bottom of reverse. On obverse 20, on reverse 19 lines. *Expense-list* (ZIG.GA occurs 3 times). Urdup had expended different amounts of wheat and date-wine, in all 41 gur 240 qa (cf. obv. 1, rev. 4); of this amount 6 gur 90 qa, at the rate of 1 gur 15 qa per month, went for 6 months to the king (obv. 14–18). Besides these 41 gur 240 qa there were expended 15 gur $216\frac{2}{3}$ qa (rev. 5–11), so that the whole amount was 57 gur $156\frac{2}{3}$ qa (rev. 13). A business transaction of Kamati. Date: month AMAR.A.A.SI of the year after Kimash had been devastated.

No. 247. Nearly complete clay tablet, 4.3×7.7 cm.; on obverse 14, on reverse 10 lines, some characters nearly effaced. *List of oxen and men* hired for the cultivation of small fields (GAN) or parcels of a large farm (A.SHAG). Two such farms are mentioned (cf. obv. 10 and rev. 8), the one consisted of 4 and the other of 3 GAN. The oxen are called GUD.KUL, 'plough oxen'; the men KAL GALU.KU.MAL, 'hired men.' Date: month of the festival of the god Dumuzi, the 21st day.

No. 248. Complete light-gray clay tablet, 6.4×8 cm.; on obverse and reverse 2 columns with 18, 17, 19 and 15 lines; the characters on the middle part of column I obv. are covered with deposits. *List of employees*. Men and women were employed at the temple E HAR.HAR.A in Sagdana.

Rev. IV. 8-11 reads: 26 KAL (strong men), 2 Æ.MASH (2 men at half wages), 3 GEME (women) E HAR.HAR.A (for the food house) MU.GUB (=present). Those employed were: a fisherman (SHU.HA), a gardener (NU^{gish}SAR), weavers (USH.BAR), a magician (USH.KU=*kalû*), a merchant (DAM.QAR), etc. Date: the 10th day of the month EZEN^{dingir}DUMU.ZI of the year in which (the king) was invested as high priest of Nannar-Karzida (cf. No. 249).

No. 249. Part of a light-gray clay tablet, 6.8×7.1 cm.; bottom part of obverse and corresponding part of reverse broken away; on obverse and reverse 2 columns with 15, 15, 16 and 10 lines. *List of employees.* This tablet is practically identical with No. 248, with the exception that it is dated on the 12th day of the month.

No. 250. Nearly complete clay tablet, 7.7×15.2 cm.; on obverse and reverse 2 columns with 23, 24, 21 and 16 lines; pieces are broken out of face of obverse column I; the last 5 lines and lines 1 and 2 of column IV rev. are nearly obliterated; line 12 of column IV rev. must have begun with SHU.NIGIN.NIGIN (total of totals), as 52 GUN $46\frac{1}{2}$ MA. NA is the sum total of the amounts given on l. 3-11 on same col.; on col. I. l. 15 the scribe repeats the expression MA.NA by mistake. An *account of wool* for clothing, furnished by 8 shepherds from their respective flocks of sheep; cf. rev. IV. 3-12. The wool was weighed (or paid for = *ba.LAL* = *shaqâlu*) on the 8th day in Borsippa (KI.NU.NIR^{ki}). Date: the year in which Bur-Sin became king.

No. 251. Nearly complete clay tablet, 10.3×13.8 cm.; upper left-hand and bottom corner of obverse and corresponding parts of reverse broken away; many of the characters on reverse partly or entirely effaced. On obverse and reverse 3 cols. with 25, 23, 23, 22, 25, and 23 lines. *List of animals*, containing: (a) a list of ewes, mature sheep, lambs, great sheep, lambs and kids, with the names of their shepherds (obv. I II. 3); (b) a statement of the purpose for which they were given out (ZIG.GA, rev. VI. 9); some

were due to the king (obv. II. 8: DA_U.HU LUGAL), the others were entrusted to the care of shepherds for periods of 12 to 15 months. Date at rev. VI effaced.

No. 252. Complete clay tablet, 7.7 × 12.8 cm.; on obverse and reverse 2 cols. with 17, 24, 27, and 18 lines; on rev. col. III. l. 1 all the characters, on l. 1 and last line of col. IV the first character partly effaced. *Account of wheat*: a total of 1 ton (KARU = 3600 gur) 136 gur 52²/₃ qa of grain, on hand at the cattle house (cf. obv. I. 1-9), was disposed of in the following manner: (a) 1416 gur 230 qa were sent away per boat (obv. I. 16, 17), (b) 1393 gur 255 qa went to Urdam (rev. III. 19, 20), (c) 37 gur 240 qa went to Lu-Ninshul (rev. III. 21-23), (d) various large amounts to others (rev. III. 24ff.). There was a deficit (LAL.NI) of 55 GUR 240 QA (rev. IV. 12). The business was transacted (NIN.SHID.AG) by Urdingirra, the *shangu* of Dungi. Date: the month SHU. KUL of the year after the 'damqar' of Ish(i)-Dagan had built a temple.

No. 253. Large clay tablet, 11.5 × 14.2 cm.; several pieces broken away: upper right-hand corner to the 10th line; lower right-hand corner for 6 lines and left-hand corner for 5 lines on obverse and corresponding part on reverse; most of the characters on rev. cols. IV and V filled in with deposits. On obverse and reverse 3 cols. with 25, 27, 23, 24, 21, and 8 lines. *Account list of grain*: at least 9 consignments (cf. obv. I. 10, 13, 18; II. 2, 13, 21; III. 6, 16, 18), each one consisting of different kinds of flour in quantities of 22 qa to 41 gur, had been sent by diverse persons (*ki*. . . . *ta*) per freight boats (MÀ); 6 boats are mentioned: MÀ SHAG.BA. NA.RIM, obv. I. 2, 12, 15, 20; MÀ GALU BA.SHAG.GA, obv. I. 4; MÀ GALU^{dingir}NIN.SHUL, obv. I. 7, II. 1; MÀ GALU^{dingir}NIN.GIR.SU, obv. I. 9; MÀ LUGAL.KI.AG, obv. I. 17, 22; MÀ UD.ZAL.LA, obv. II. 20. The summing up (obv. III. 19-23) gives: 3 gur 180 qa of BA.BA flour, 106 gur 28 qa of KAL (coarse) flour, 262 qa, 1 gur 130 qa, 180 qa, etc. The total amount as given on obverse must have

been about 470 gur. The reverse has a different account of a similar nature. Some of the flour was to serve as food for oxen and sheep (SHAG.GAL GUD.UDU; obv. III. 14 and rev. V. 2), some as food for men (SHAG.GAL GALU; obv. III. 9). Date: the year in which Bur-Sin became king.

No. 254. Large clay tablet, 10.9×16.7 cm.; piece broken off extending from middle of upper edge of obverse along right-hand edge to end of 3d col. at lower edge, with corresponding part of reverse. Four cols. on obverse and reverse with 37, 40, 41, 29, 20, 30, 18, and 2 lines; small characters. *Pay-list of hired men and women.* The tablet states in each case (a) how many and for how long employed; (b) for what kind of work; (c) wages; (d) name of official (overseer). For employees and officials see '*Introduction*,' p. 33ff. The wages varied from 1 to 4 qa per day and person; according to obv. II. 3-7:

33	slaves	received	80	qa	each	for	30	days,
5	"	"	60	"	"	"	20	"
6	"	"	30	"	"	"	20	"
4	"	"	20	"	"	"	20	"

The total grain (SHE.BI) expended was 10 gur 200 qa. These slaves (ERIM) received each per day $2\frac{2}{3}$, 3, $1\frac{1}{2}$ or 1 qa. According to this tablet the official called NU.BANDA had the supervision over companies of men numbering from 12 to 281; a PA had not more than 16 men under him; the BANDA(or DUMU).BA.TIL, 'slaughterers,' were for the temple of ^{dingir}Ninmar^{ki}, the KALAM(or UG).GIL, 'carriers,' for the temple of ^{dingir}Dumuzi. On col. VI of rev. the summing up begins: the total of men employed was 1718, who had at least 17 NU.BANDA and 2 PA over them. No date is given; the subscription on rev. col. VIII reads simply: NIN.SHID.AG KI.UR.GAR (or SHA), 'Business transaction of Kiurgar.'

No. 255. Complete clay tablet, 4.2×7.1 cm.; on obverse and reverse 10 lines, on bottom edge of reverse 1 line. *Expense-list:* given out were 35 gur $117\frac{1}{2}$ qa of best wheat for the

king, 66½ qa of barley together with 6 shekel of oil, 16 qa of date-wine, 11 qa of barley and 12 shekel of oil for 2 months, from the month GAN.MASH to the following month GUD.DU.NE.SAR.SAR. No date.

No. 256. Large clay tablet, 19.9 × 18.9 cm.; piece broken off on left hand of obverse, extending from top of col. I to beginning of last line of col. III; edge of col. VI of obverse, extending from the middle of col. to last line of col. V, with corresponding parts of reverse, broken away. On obverse and reverse 6 cols. with 20, 32, 37, 38, 39, 35, 37, 36, 37, 38, 18, and 8 lines; clear characters. *Account of grain*
The tablet states:

(1) that there were 6 amounts of grain at the temple of Dungi and Ningishzidda, each consisting of different quantities, obtained from (*ki. ta*) diverse persons; cf. obv. I. 1-20, II. 27-III. 22, IV. 20-V. 9, VI. 21, rev. VII. 27-VIII. 10, IX. 13-18;

(2) how each of these was expended:

(a) for sowing certain fields, consisting of so and so many GAN at the rate of 1 gur 50 qa, 1 gur 60 qa, and 1 gur 240 qa per GAN;

(b) as food for cattle (*HAR.GUD = ballu, imrû* obv. IV. 10);

(c) as wages for hired helpers (*ID* or *À KU.MAL*, obv. II. 5).

These expenditures are given obv. II. 1-26, III. 23-IV. 24, V. 10-VI. 4, VI. 22-VII. 26, VIII. 11-IX. 12, IX. 29-X. 31. The summing up follows on rev. X. 32 to end of col. XI. There was a deficit (*LAL.NI*) of 1 gur 35 qa in one case (cf. rev. XI. 16), and in another case a surplus (*DIR.A.A.AN*, rev. XI. 17, 18) of 10 qa.

The subscription (rev. XII. 1-4) reads: *NIN.SHID.AG GAN. GAN.NA | E^{dingir}DUN.GI | U E^{dingir}NIN.GISH.ZID.DA*, 'a business transaction concerning the fields of the temples of the god Dungi and the god Ningishzidda.' Date: the year in which Simurum and Lulubu were devastated for the ninth time.

No. 257. Complete clay tablet, 2.5×2.8 cm.; on obverse 4, on reverse 3 lines. *Pay-list*: 60 (qa of oil?) were paid to the UH.ME (*pashishu*, 'anointer') of ^{dingir}KAL in addition (DAH.HU) to a former payment. No date.

No. 258. Large clay tablet, 17×16.6 cm.; on obverse the ends of nearly all the lines of col. V broken away, hole 3.2×3.2 cm. broken out of face of obverse near lower edge in cols. IV and V, on reverse 4 or 5 lines of col. III near top filled in with deposits, holes broken out of face of reverse near upper and left-hand edge, near top and right-hand edge, near lower and left-hand edge; a few lines near bottom edge of reverse filled in with deposits. On obverse and reverse 5 columns each with 32, 30, 26, 31, 27; 33, 28, 33, 38, and about 10 lines.

The tablet contains an *account* of wool worked into garments by women. It is stated in each case

- (1) how much wool, shorn from the back of male goats, was used for garments of diverse qualities;
- (2) whence the wool came;
- (3) how many women were employed;
- (4) how long employed (rev. VI. 26-VII. 1);
- (5) how much wages (ID.BI) they received;
- (6) totals (a) of wool used, (b) of wages; cf. obv. IV. 1-15: SIG.GA and RUG.BI.
- (7) the number of garments of each quality and the whole amount of wool used for all the garments of each class; cf. IV. 16: KIL.LAL.BI;
- (8) total amount of wages; cf. obv. V. 15, rev. VI. 10, 15, 19, VII. 6;
- (9) how much woollen thread was used, cf. rev. I. 19: 8 TU GU.SIG.

The reverse has an account of the same kind as the obverse. All the women employed did the same amount of work as $145,725\frac{2}{3}$ women would do in one day, cf. rev. IX. 10. The wool given out (ZIG.GA) was 18 talents. . . . mina $19\frac{5}{6}$ shekel; cf. rev. IX. 11.

The subscription on the last col. of the reverse reads: NIN.
 SHID.AG | PA GALU^{dingir}NIN.MAR^{ki} | NU.BANDA
 A.ĤU.UM DINGIR | ITU ZIB.KÛ *ta* | ITU SHE.IL.LA
shu | ITU.BI 8 KAM, 'a business transaction of the PA
 Lu-Ninmar^{ki} and the NU.BANDA Āhum-ili (for the time)
 from the month ZIB.KÛ to the month SHE.IL.LA, that is
 eight months.' Date: the year in which Bur-Sin became
 king.
